🔄 Abdelrahman Mostafa

### PROFILE

---

Front-End Developer (2+ years) specializing in React and Next.js. Proven track record of building fast, maintainable interfaces with strong UX fundamentals. Experienced in translating complex product requirements into production-ready features that drive real user value.

### EXPERIENCE

---

#### Lesoll, Frontend Developer 🔗

Jun 2023 – present

- **Engineered a scalable, SEO-optimized property & e-commerce platform** using Next.js, React, and TypeScript, improving organic reach and core web vitals.
- **Architected a real-time user-to-agent chat system** leveraging WebSockets, enabling instant communication and improving lead conversion rates.
- **Developed a comprehensive internal admin dashboard** with complex CRUD operations and predictable state management (Redux Toolkit) to automate listing, user, and content management workflows.
- **Integrated complex third-party services** including RESTful APIs and Google Maps API to build dynamic property search, map views, and advanced filtering.
- **Spearheaded application internationalization (i18n)**, delivering full multi-language support that significantly expanded the platform's accessible user base.
- **Modernized legacy architecture and managed cloud deployments**, refactoring frontend code for maintainability and deploying the application to AWS (EC2) with Nginx for reliable, secure scaling.
- **Tech Stack:** Next.js, React, TypeScript, Tailwind CSS, Redux Toolkit, WebSockets, REST APIs, i18n, AWS (EC2), Nginx.

### PROJECTS

---

#### EgyStay | Modern Property Rental Platform 🔗

- Built a comprehensive property rental platform connecting travelers with unique accommodations across Egypt, featuring distinct portals for guests and hosts.
- Developed a seamless booking engine with secure payment integration, an interactive map-based search, and real-time chat functionality using **Socket.io** 🔗.
- Engineered a responsive, localized (en/ar with RTL support) interface using **Next.js 16**, **React 19**, and **Tailwind CSS**, optimized for performance and accessibility with **Radix UI**.
- Implemented complex state management and data fetching pipelines leveraging **Redux Toolkit**, backed by a robust API authentication flow using Google OAuth.

#### b8lnk - Full-Stack Link Management Platform 🔗

- Built a complete Full-Stack **Next.js/Express.js** application allowing users to generate shortened links with custom, manipulated **Open Graph** (OG) metadata.
- Designed a scalable backend with **Node.js** and **MongoDB**, incorporating robust input validation (**Zod**) and comprehensive API documentation (**Swagger**).
- Engineered a real-time analytics system parsing IP locations (**geoip-lite**) and browser/device fingerprints (**ua-parser-js**).
- Implemented secure authentication flows using **Google OAuth**, **bcrypt**, and **JWTs** with automated token refreshing.
- Integrated complex third-party services, including **Cloudinary** for image asset management, **Resend** for email.
- Delivered a polished, responsive UI utilizing **Tailwind CSS v4**, **Framer Motion**, and **shadcn/ui**.

### Dorymart - Modern E-Commerce

- Developed a responsive and highly interactive e-commerce platform using **Next.js 15**, **React 19**, and **Tailwind CSS**, focusing on performance and SEO through Server-Side Rendering (SSR).
- **Advanced UI & Animations:** Engineered a playful, engaging user experience by integrating **GSAP** (GreenSock) for complex micro-animations and smooth transitions alongside accessible **Shadcn UI** primitives.
- **Robust State Management:** Implemented centralized global state using **Redux Toolkit** to seamlessly manage complex shopping cart logic, product filtering, and persistent local storage caching to maintain cart state across sessions.

### Sa3teen Gad — Full-Stack Productivity Platform

- Designed and developed a comprehensive productivity web application completely tailored for Arabic speakers, featuring Pomodoro timers, wellness reminders, and Islamic prayer time integrations.
- **Modern Interface & Animations:** Built a beautiful, minimalistic frontend using **Next.js 16**, **React 19**, and **Tailwind CSS v4**, integrating **Framer Motion** for fluid UI transitions and accessible **Shadcn UI** components.
- **Advanced Task Management:** Engineered a robust, interactive task management system featuring drag-and-drop capabilities utilizing **@dnd-kit**, with complex local state managed globally via **Redux Toolkit**.
- **Backend Integration & Authentication:** Developed a secure backend architecture utilizing Next.js API Routes and **MongoDB (Mongoose)**, implementing fully-featured authentication flows utilizing **Google OAuth** and custom JWTs handling both registered and temporary guest users.
- **Robust Data Handling:** Ensured absolute data integrity and seamless UX by implementing strict schema validation utilizing **Zod** and **React Hook Form**, alongside comprehensive date/time manipulation using **date-fns**.

## EDUCATION

---

### Faculty of Computer Science and Artificial Intelligence - Helwan University,

*BSc: Computer Science and Information System *

**Key Classes:** *Object Oriented Programming - Business Management - Design Patterns.*
